

Substantial Savings

World Dryer's AirMax hand dryers pay for themselves.
Savings from 46 AirMax units at Carrier's Indianapolis facility:

Financial savings per year*

Cost of paper towels	\$24,456
Cost to dispose of paper towels at landfill	\$2,703
Maintenance and housekeeping costs	\$17,333
Decrease in plumbing maintenance	\$24,000
Energy cost for hand drying	(\$1,000)
Hand dryer maintenance	(\$460)
Total savings per year	\$67,032
Cost to purchase and install hand dryers	(\$43,170)
Payback period (months)	8
Internal rate of return	154%

Environmental savings per year**

Reduction in nonrecycled waste	18,900 pounds
Landfill space saved	29 cubic feet
Estimated trees saved	26

*While savings will vary depending on the situation, most users experience at least a 90 percent savings over their previous paper towel-related costs. A World Dryer representative can provide a savings analysis for your facility.

**Pollutants released, and energy and water consumed in the paper manufacturing process are not included in this example.

WORLD DRYER

World Dryer, the world's premier hand-dryer company, is a subsidiary of Carrier Corporation, a United Technologies Company.

WORLD DRYER SOLUTIONS

For Industrial Facilities

The green solution to cleaner, lower-maintenance restrooms at less cost

Cleaner, Better Restrooms

Maintenance supervisors at Carrier's 1.3 million-square-foot, 1,900-employee Indianapolis HVAC plant wanted to improve sanitation, trim costs and reduce waste in the plant's restrooms. They turned to World Dryer for help.

// The AirMax was the only hand dryer we found that was fast enough and durable enough to handle a factory environment. We knew we would get the cost savings. What really surprised us was how much cleaner our restrooms became. //

Bill Wilson, manager of facilities

Big Savings, Little Effort

The results from installing AirMax hand dryers at the Carrier plant were significant:

- Cleaner restrooms
- No more paper towel expenses
- No more paper towel waste
- No more towel-clogged toilets

// We estimate the hand dryers saved us more than \$2,000 a month in plumbing costs, alone. Before, we had plumbers here at least once a day. Now they come only once a month. //

Dee Ottinger, lead cleaning technician

AirMax is a part of this facility's quest for "Gold" in the United Technologies ACE quality program.

Harness the Power of AirMax

- Dries hands in 15 seconds – half the time of standard electric dryers
- Delivers a high-volume output of 275 cubic feet per minute
- Lowest noise in its class
- State of the art and energy-efficient
- GreenSpec®-listed
- The most durable dryers in the industry; built tough for the factory environment and vandal-resistant

Warranty	10-year limited; five years on motor and sensor
Cover options	Cast iron, stamped steel and stainless steel
Volts	115 or 208/230
Watts	2,300
Installation	Surface or recessed mounted
