

The **hands-free** alternative for opening a restroom door

MODEL FP03

## Installation Instructions

**Tools required:** #2 PHILLIPS HEAD SCREW DRIVER (or DRILL BIT & DRILL), TAPE MEASURE, PENCIL

- Step 1.** Following the diagram (Fig 1a.), measure 1 inch from the side, and 3-1/2" from the floor, mark the door where the **footpull** will be installed. Peel the backing off the adhesive strips located on the back of the **footpull** (Fig 1b.) Press the device firmly against the door so that the tape forms a good bond.

- Step 2.** Using the screws provided (Fig 2), anchor the footpull securely to the door. Tighten the screw until it just firmly seats against the plate.  
**WARNING:** Use caution to avoid overtightening the screws and thus stripping the threads.
- Step 3.** Select an area on the door about eye-level and near the outer edge of the door (opposite the hinge). Clean and dry the surface of the area. Peel the backing from the sticker provided and affix it to the door.

### IMPORTANT NOTE

*If desired, follow the door closer manufacture's instructions to change the spring tension to enable smooth and safe use of the FootPull.*
