### ARCHITECTURAL AND ENGINEERING SPECIFICATIONS

# MODEL A SERIES HAND DRYERS

Models A5, XA5, DA5, DXA5, RA5, XRA5 and DXRA5

#### **Facts**

Saves up to 95% of paper towel costs

Reduces maintenance costs, vandalism and mess associated with paper towels

Saves trees from becoming paper towels

Reduces burden on clogged landfills

Uses less energy and produces fewer greenhouse gases than the production of paper towels

### Features

Superior engineering and high performance

Quality materials provide maximum durability and vandal resistance

Available in a variety of cover options, push button or automatic, surface mounted or ADA compliant recessed models

Universal nozzle is shipped fixed and is easily convertible to swivel

BERLS.COM

### Warranty

10 year limited 5 year on sensor

3 year on motor brushes

### MODEL A SPECIFICATIONS

Models A5, XA5, DA5, DXA5, RA5, XRA5 and DXRA5 hand dryers shall be manufactured by or for World Dryer Corporation® to include a cover made of 1/4" thick cast iron with porcelain enamel finish, 14 gauge polished or brushed 304 stainless steel, 0.08" thick epoxy coated Cold Rolled Steel, or 1/4" thick WorldStone Thermoset Polymer. Motor shall be universal type, 1/10 HP at 7500 RPM. Dryers shall deliver 200 cubic feet per minute of air volume (7300 LFM). Timer shall be electromechanical cam-style with 25 AMP rated switch to operate dryer for 30 second period on push button units. Infrared sensor detects hands, initiates and terminates drying on automatic units. Recessed units are made with cast iron covers and use a 16-gauge steel wall mounting box. Hand dryers shall be listed under reexamination service of Underwriters Laboratories, Inc.

**BERLS.COM** 

MODEL NUMBERS For specification purposes, a model with a "5" in the model number (indicating a fixed nozzle) is the same as a model without the 5 (indicating a swivel nozzle). All Model A dryers now come only with fixed Universal nozzles that can be easily adjusted during installation (or thereafter) to be a swivel nozzle. Example: an A-974 is the same for specification purposes as an A5-974. The unit can only be purchased as an A5-974. Read the notes under the chart for more ordering information.

# PLANNING GUIDE

# **QUANTITY ESTIMATE**

Side View

Average traffic: 1 dryer per 2 washbasins

9.5" (241 mm)

Heavy traffic: 1 dryer per washbasin 54" Bradley sink: 4 dryers per sink

### ADA COMPLIANCE 👃

Recessed dryers come standard with "Q" nozzle to comply with ADA 4" protrusion requirements.

### INSTALLATION

Hand dryers require a dedicated 20 AMP circuit, and must be properly grounded. GFI Circuit protection is recommended. One side of dryer should be mounted to a stud.

### DRYER PLACEMENT

# **MEASUREMENTS**

Hand dryers should be placed at least 2
feet apart, near but not over the washbasin.
In congested areas dryers should be placed
to create a traffic flow from wash basin to
dryer to exit. Automatic dryers should be
placed more than 18" above or away from
projections, which may interfere with the
operation of the automatic sensor.

# COVER MATERIALS

CAST IRON COVERS provide the ultimate in durability and vandal-resistance. The 1/4" thick cast iron with porcelain enamel construction makes this option suitable for areas such as train and bus stations, schools, theaters, airports, and prisons.

STEEL COVERS are an excellent alternative. They are both durable and economical. Grade 304 stainless steel covers are vandal resistant and offer a touch of elegance.

WORLD STONE COVERS provide a durable, cost effective option to traditional metal covers. Available for Model A, surface mounted, automatic hand dryers. Embedded with antimicrobial agents to promote hygiene. Material originally developed for use in high temperature, demanding aerospace and automotive applications.
